This unit is in a **SUSPECT OUTBREAK**

Organism: _______________________

**ATTENTION**

**STAFF:**
When in an outbreak, follow these steps to minimize risk of transmission:
- Be diligent with hand hygiene.
- Remind and assist our clients to perform hand hygiene properly.
- Assist visitors to use PPE properly.
- Disinfect commonly used items before and after use (i.e., stethoscope).
- Wear clothing that is easily laundered in hot soapy water and dried in a hot dryer after every shift.
- Do not eat or drink on the unit.

**VISITORS:**
- Perform hand hygiene with alcohol-based hand rub or soap and water before and after your visit.
- Only meet with one client per hospital visit.
- If you are ill, please delay your visit until you are well.
- Avoid sitting on or setting your belongings on the client bed.

These extra protective measures are a requirement of the Infection Prevention & Control policy 55-30 ARO Outbreak.
