General Pediatrics Locum
Medical Genetics and Metabolics Clinical Associate

Posting Date: May 21, 2020

Position profile – Saskatchewan Health Authority – Saskatoon and University of Saskatchewan, Department of Pediatrics, Divisions of Medical Genetics and Metabolics is seeking applications for a full-time or part-time General Pediatric specialist to provide Clinical Associate services for up to a one year locum term. This position could be shared with up to two physicians.

The Department of Pediatrics is dedicated to providing exemplary health care for children, ensuring excellence in training of future pediatrics health care providers, undertaking meritorious research and advocating for the health and well-being of children and youth.

Under the supervision of the Medical Geneticist and/or Metabolic Physician, the Clinical Associate will aid in the care of pediatric inpatients and outpatients within the Medical Genetics and Metabolics services. Responsibilities will include assisting with inpatient consultations, caring for admitted patients, assisting with outpatient clinics, and helping to coordinate the care of patients and families. The Clinical Associate will be an integral part of a team which includes a Medical Geneticist, a Metabolic Physician, nurse clinical coordinators, genetic counsellors, a dietician, and administrative assistants.

Compensation details – up to $321,055 per annum for full-time locum position

Benefits – Benefits are the responsibility of the successful candidate

Location of practice – Saskatoon, Saskatchewan

Qualifications/Requirements of the position – Completion of a four year residency in Pediatrics, with certification or eligibility for certification in Pediatrics with the Royal College of Physicians and Surgeons of Canada, and be eligible for licensure with the College of Physicians and Surgeons of Saskatchewan. Preference will be given to physicians who have prior experience working in the Medical Genetics and/or Metabolics services.
