

## MEDICLINIC

The Mediclinic at 3333 8<sup>th</sup> Street in Saskatoon is currently recruiting full and part time physicians to join our practice group. Our clinic offers 7 day a week, extended hour urgent care and family medicine services to our patient population.

We are a group of 14 full and part time physicians. Our physician staff offer expertise in a variety of areas including family medicine, chronic disease management, integrative and wellness medicine, occupational medicine, sports medicine, immigration and emigration medical services, travel and immunization medicine as well as acute ambulatory care. A number of our staff are also on the faculty of the Department of Family Medicine and teach residents and medical students at the clinic. We have an active PBSGL group which is well attended. We are committed to continually strive to improve our services to our patients.

Physicians at the clinic enjoy much flexibility in their practice styles and schedules to suit their lifestyle preferences. They provide a combination of walk in urgent care as well as regular scheduled family medicine appointments.

Our physicians are paid on a fee-for-service basis. Their income varies with the number of hours they work and on how actively they build their practice. We have daily requests for patients seeking family physicians. Annual pre-tax, post-overhead 'in clinic' earnings of our full time doctors range from \$190,000 to \$240,000.

We are confident that you would find work at our clinic engaging and rewarding. We are equally confident that you will find the medical and support staff collegial and the practice setting comfortable. We are committed to helping you establish yourself in a satisfying practice.

We invite interested individuals to apply in confidence to:
