

November is Fall Prevention Month

We all have a role to play in preventing falls

Huddle Talk: Care planning is required to prevent falls by identifying risk factors.

We can identify risk factors holistically through a combination of assessments:

- Fall Prevention Screens;
- Nursing assessment and Inter-professional team assessments
- TLR
- Speaking with client and family.

Once the risk factors are known draw up a Care Plan for safety!

The Saskatchewan Health Authority recognizes falls are serious safety concern and is a partner in the national fall prevention campaign.
