

**You can't see it.
You can't smell it.
But breathing it in can be deadly.**

Carbon Monoxide (CO) is an odourless, colourless gas that can cause sudden illness and death.

Protect against CO poisoning

- Have your heating system, water heater and any other gas, oil or coal burning appliances serviced by a qualified technician every year.**

- Have a mechanic check the exhaust system of your vehicle every year.**

- Install a battery-operated CO detector in your home and check or replace the battery every 6 months.**
