

For use at Acute Care sites using SCM Order Entry.

Standard Work:

1. Identify patient according to SHA policy
2. Starred labels indicate which tubes to collect, note any collection comments
3. Fill tubes in correct order of draw
4. Label each specimen with the correct label
 - a. Starred label on collection tube "Follow the stars"
 - b. Place 4 digit number on label towards top of tube; ex 0000
5. Initial and add time of collection on bottom right hand side of demographic label

Collect on ice/protect from light
