

## **Guidelines for Physicians for Nuclear Medicine Procedures**

To schedule a test with the Nuclear Medicine Department, Fax the completed, signed requisition to (306) 655-1742. Keep the original copy in the patient's file for your records.

The completed requisition must contain:

- Complete patient biographical data and contact information such as current address and phone number
- Date Of Birth
- 9-digit Saskatchewan Health Number
- RUH number (if known)
- procedure requested
- relevant clinical history
- current medications
- patient's height and weight

The Clinical History will determine what priority rating the request receives for scheduling. **Please ensure all writing is legible.**

All patients are required to report to the RUH **Admitting Department** (NOT OUTPATIENT DEPARTMENT) 30 minutes PRIOR to their scheduled appointment time to register. They will then be directed to the Nuclear Medicine Department to begin their procedure.
