

Royal University Hospital & Children's Hospital of Saskatchewan Site Update - Sept. 2016

New route changes and construction zones

Starting week of Tuesday, September 6 and through the early fall, traffic patterns will be changing around the Royal University Hospital site related to both the 1955 Tunnel repairs and construction of the maternal and children's hospital.

- Exiting traffic will continue to be reduced to a single lane.
- Access to the emergency, Ellis Hall, Dubé Center and Old Main Entrance (1955 Building) remains.
- Vehicle access to Old Main Entrance (1955 Building) will shift slightly through fall with CHS construction activities.

CHS Road Disruptions: Changing Traffic Pattern to Access Old Main Entrance

Starting week of September 6, CHS crews will begin needed duct work construction for infrastructure connections. Road access to the Old Main Entrance to 1955 RUH Building will be maintained, but the path may alter slightly as work progresses. This work is also expected to be completed in the fall. CHS construction is anticipated to be within the main building's construction zone by fall, with minimal construction activity occurring within the parkade and on roadways.

Ellis Hall Main Doors Re-Open

Starting week of September 12, the '55 tunnel repair location will move. Ellis Hall main doors will re-open, along with the return of mobility parking stalls. Tunnel repairs are now in the final stages and expected to be completed this fall.

(More site information on Page 2)

RUH Parkade: Repairs Progressing and Stairwell Closure

Parkade repairs are continuing as scheduled, with more patient and family parking stalls expected to be opened later this fall.

However, an **approximately one-month stairwell closure on Level P3 is expected in mid-September**. Crews will be adding a landing ramp and traffic coating to this stairway exit. This will also result in the closure of approximately eight stalls and the drive lane in front of the stairwell.

During this temporary closure, please use alternate stairwells to access the other parkade levels and follow signage for any traffic re-routing.

Remember:

Levels P2 and P3 stalls are for patients and families only.

All staff and physicians who have parking permits, with the exception of those with mobility permits or Level P1 access, are being reminded to park on Levels P4 and P5. Parking Services is asking for support to keep stalls on Level P2 and P3 available for patients and families in order to support them in having the closest access possible to the Level P3 Hospital Entrance.

PLEASE: Remind patients and families of ongoing traffic and parking challenges for this site.

Please ensure you are continuing to remind your patients and families in both conversations and in written correspondence for appointments or procedures to give themselves additional time when driving to the site.

Here is some information you can continue to share with them.

PARKING AT ROYAL UNIVERSITY HOSPITAL

- Please give yourself additional time to find parking and pay attention to detour signs as spaces are limited with construction activity underway and roads changing periodically.
- While Levels P2 and P3 are dedicated patient and family parking, additional parking spots are often available on the top two levels of the parkade (Level P4 and Level P5). However, these do NOT have elevator access and require you to use stairs. We do offer a courtesy shuttle parkade service for those with mobility challenges.
- The courtesy shuttle service in the parkade can be accessed by calling 306-514-7577 or waving down one of the drivers circulating through the parkade. Pick up/drop off is anywhere on parkade levels P2 thru P5 and we can take you to and from the new Level P3 hospital entrance, Old Main Entrance, Dubé Centre or Ellis Hall. The shuttle operates Monday to Fridays (7:30 am to 8:30 pm); Weekends (9:00 am to 5:00 pm).
- Vehicles over two metres (2 m) in height do not fit in the parkade. Please use oversize vehicle parking just to the south of Ellis Hall.
- More parking information can be found at www.saskatoonhealthregion.ca/parking
