**This hospital occupancy report represents a point in time and is not a complete picture of Saskatoon hospital capacity or occupancy.**

Hospital occupancy levels change continuously throughout the day and night as patients are admitted and discharged. The report includes vacant beds, however does not show when a vacant bed has been reserved for the next incoming patient from other areas or those unoccupied due to temporary bed closures.

*Alternate Level of Care (ALC)* are patients assessed by the care team as needing to remain in hospital but no longer need the specialty care of that unit.

Admit No Beds (ANB) measures the number of patients in the Emergency Department who have been admitted to hospital but have not been moved up to the inpatient unit.
